

Insurance Distribution Platform

Volume 02 – Business Goals

Purpose

This document defines the strategic business goals that the Insurance Distribution Platform must achieve. It is intended to guide product management, business analysis, architecture and delivery. It is business-focused and technology-neutral.

Primary Goal

Create a bank-owned, insurer-agnostic insurance distribution platform that provides a single, consistent, compliant and measurable customer journey from lead creation through policy issuance while allowing the bank to independently evolve its products, integrations and operating model.

Customer Experience Goals

Provide a simple digital journey, reduce repeated data entry, enable transparent product comparison, improve turnaround time, support assisted and self-service journeys, and maintain a consistent experience across insurers.

Relationship Manager Goals

Enable RMs to manage customers, leads, suitability, recommendations, quotes and proposals from one workspace while improving productivity and reducing manual effort.

Business Growth Goals

Increase insurance penetration, improve quote-to-policy conversion, shorten sales cycles, enable rapid product launches and simplify onboarding of new insurers.

Operational Excellence Goals

Reduce operational overhead, standardize workflows, improve visibility, automate manual activities, provide real-time status tracking and strengthen auditability.

Governance & Compliance Goals

Maintain customer consent, business rule governance, complete audit trails, configurable regulatory controls, secure handling of customer information and traceable business decisions.

Technology Independence Goals

Keep business capabilities independent of specific integration providers. Support 1SB initially while enabling gradual migration to direct insurer integrations without changing business behaviour.

Reporting & Analytics Goals

Provide dashboards for RM, branch, operations and executives; enable conversion analysis, SLA monitoring, insurer performance measurement and business insights.

Future Readiness Goals

Support multiple lines of business, configurable product rules, new insurer onboarding, additional distribution channels and future digital capabilities.

Business Goal Catalogue

Goal ID	Goal	Success Indicator
BG-001	Single insurance platform	All journeys managed through one platform
BG-002	Improve RM productivity	Reduced processing time
BG-003	Increase conversion	Higher quote-to-policy conversion
BG-004	Integration independence	Easy onboarding/replacement of partners
BG-005	Operational visibility	End-to-end journey tracking
BG-006	Compliance	Complete consent and audit coverage
BG-007	Scalability	Support new insurers and products
BG-008	Customer satisfaction	Improved journey completion and experience

Alignment Statement

Every business requirement, process, architectural decision, API, integration, user story and implementation task should be traceable to one or more business goals defined in this document. This document serves as the strategic reference for programme governance.
