

Insurance Distribution Platform

Volume 03 – Business Requirements (Baseline v1.0)

Important Note

This document is a structured baseline of the business requirements discussed so far. It is not a claim that every future business requirement for the programme has been discovered. As business workshops continue, this catalogue should be expanded and versioned.

BR-CUST — Customer Management

Requirement Area	Description
Objective	Provide end-to-end business capability for customer management.
Actors	Customer, RM, Operations, Admin, Partner Insurer (as applicable).
Core Requirements	Create, search, update, validate, track status, audit actions, configurable rules, reporting.
Business Rules	Rules shall be configurable, version-controlled and auditable.
Inputs	Business data required to execute the capability.
Outputs	Business outcome and updated journey state.
KPIs	Conversion, SLA, turnaround time, adoption, quality.
Dependencies	Identity, customer, consent, product and integration services.

Sample Requirement IDs

BR-CUST-001: Platform shall support create/read/update/search operations.

BR-CUST-002: Platform shall maintain complete audit history.

BR-CUST-003: Platform shall support configurable business rules.

BR-CUST-004: Platform shall expose operational reporting.

BR-CUST-005: Platform shall support exception handling and recovery.

BR-RM — Relationship Manager Workspace

Requirement Area	Description
Objective	Provide end-to-end business capability for relationship manager workspace.
Actors	Customer, RM, Operations, Admin, Partner Insurer (as applicable).
Core Requirements	Create, search, update, validate, track status, audit actions, configurable rules, reporting.
Business Rules	Rules shall be configurable, version-controlled and auditable.
Inputs	Business data required to execute the capability.
Outputs	Business outcome and updated journey state.
KPIs	Conversion, SLA, turnaround time, adoption, quality.
Dependencies	Identity, customer, consent, product and integration services.

Sample Requirement IDs

BR-RM-001: Platform shall support create/read/update/search operations.

BR-RM-002: Platform shall maintain complete audit history.

BR-RM-003: Platform shall support configurable business rules.

BR-RM-004: Platform shall expose operational reporting.

BR-RM-005: Platform shall support exception handling and recovery.

BR-LEAD — Lead Management

Requirement Area	Description
Objective	Provide end-to-end business capability for lead management.
Actors	Customer, RM, Operations, Admin, Partner Insurer (as applicable).
Core Requirements	Create, search, update, validate, track status, audit actions, configurable rules, reporting
Business Rules	Rules shall be configurable, version-controlled and auditable.
Inputs	Business data required to execute the capability.
Outputs	Business outcome and updated journey state.
KPIs	Conversion, SLA, turnaround time, adoption, quality.
Dependencies	Identity, customer, consent, product and integration services.

Sample Requirement IDs

BR-LEAD-001: Platform shall support create/read/update/search operations.

BR-LEAD-002: Platform shall maintain complete audit history.

BR-LEAD-003: Platform shall support configurable business rules.

BR-LEAD-004: Platform shall expose operational reporting.

BR-LEAD-005: Platform shall support exception handling and recovery.

BR-CONSENT — Consent Management

Requirement Area	Description
Objective	Provide end-to-end business capability for consent management.
Actors	Customer, RM, Operations, Admin, Partner Insurer (as applicable).
Core Requirements	Create, search, update, validate, track status, audit actions, configurable rules, reporting
Business Rules	Rules shall be configurable, version-controlled and auditable.
Inputs	Business data required to execute the capability.
Outputs	Business outcome and updated journey state.
KPIs	Conversion, SLA, turnaround time, adoption, quality.
Dependencies	Identity, customer, consent, product and integration services.

Sample Requirement IDs

BR-CONSENT-001: Platform shall support create/read/update/search operations.

BR-CONSENT-002: Platform shall maintain complete audit history.

BR-CONSENT-003: Platform shall support configurable business rules.

BR-CONSENT-004: Platform shall expose operational reporting.

BR-CONSENT-005: Platform shall support exception handling and recovery.

BR-SUIT — Suitability & Recommendation

Requirement Area	Description
Objective	Provide end-to-end business capability for suitability & recommendation.
Actors	Customer, RM, Operations, Admin, Partner Insurer (as applicable).
Core Requirements	Create, search, update, validate, track status, audit actions, configurable rules, reporting.
Business Rules	Rules shall be configurable, version-controlled and auditable.
Inputs	Business data required to execute the capability.
Outputs	Business outcome and updated journey state.
KPIs	Conversion, SLA, turnaround time, adoption, quality.
Dependencies	Identity, customer, consent, product and integration services.

Sample Requirement IDs

BR-SUIT-001: Platform shall support create/read/update/search operations.

BR-SUIT-002: Platform shall maintain complete audit history.

BR-SUIT-003: Platform shall support configurable business rules.

BR-SUIT-004: Platform shall expose operational reporting.

BR-SUIT-005: Platform shall support exception handling and recovery.

BR-PROD — Product Catalogue & Product Matrix

Requirement Area	Description
Objective	Provide end-to-end business capability for product catalogue & product matrix.
Actors	Customer, RM, Operations, Admin, Partner Insurer (as applicable).
Core Requirements	Create, search, update, validate, track status, audit actions, configurable rules, reporting.
Business Rules	Rules shall be configurable, version-controlled and auditable.
Inputs	Business data required to execute the capability.
Outputs	Business outcome and updated journey state.
KPIs	Conversion, SLA, turnaround time, adoption, quality.
Dependencies	Identity, customer, consent, product and integration services.

Sample Requirement IDs

BR-PROD-001: Platform shall support create/read/update/search operations.

BR-PROD-002: Platform shall maintain complete audit history.

BR-PROD-003: Platform shall support configurable business rules.

BR-PROD-004: Platform shall expose operational reporting.

BR-PROD-005: Platform shall support exception handling and recovery.

BR-QUOTE — Quote Management

Requirement Area	Description
Objective	Provide end-to-end business capability for quote management.
Actors	Customer, RM, Operations, Admin, Partner Insurer (as applicable).
Core Requirements	Create, search, update, validate, track status, audit actions, configurable rules, reporting.
Business Rules	Rules shall be configurable, version-controlled and auditable.
Inputs	Business data required to execute the capability.
Outputs	Business outcome and updated journey state.
KPIs	Conversion, SLA, turnaround time, adoption, quality.
Dependencies	Identity, customer, consent, product and integration services.

Sample Requirement IDs

BR-QUOTE-001: Platform shall support create/read/update/search operations.

BR-QUOTE-002: Platform shall maintain complete audit history.

BR-QUOTE-003: Platform shall support configurable business rules.

BR-QUOTE-004: Platform shall expose operational reporting.

BR-QUOTE-005: Platform shall support exception handling and recovery.

BR-PROP — Proposal Management

Requirement Area	Description
Objective	Provide end-to-end business capability for proposal management.
Actors	Customer, RM, Operations, Admin, Partner Insurer (as applicable).
Core Requirements	Create, search, update, validate, track status, audit actions, configurable rules, reporting.
Business Rules	Rules shall be configurable, version-controlled and auditable.
Inputs	Business data required to execute the capability.
Outputs	Business outcome and updated journey state.
KPIs	Conversion, SLA, turnaround time, adoption, quality.
Dependencies	Identity, customer, consent, product and integration services.

Sample Requirement IDs

BR-PROP-001: Platform shall support create/read/update/search operations.

BR-PROP-002: Platform shall maintain complete audit history.

BR-PROP-003: Platform shall support configurable business rules.

BR-PROP-004: Platform shall expose operational reporting.

BR-PROP-005: Platform shall support exception handling and recovery.

BR-UW — Underwriting Tracking

Requirement Area	Description
Objective	Provide end-to-end business capability for underwriting tracking.
Actors	Customer, RM, Operations, Admin, Partner Insurer (as applicable).
Core Requirements	Create, search, update, validate, track status, audit actions, configurable rules, report
Business Rules	Rules shall be configurable, version-controlled and auditable.
Inputs	Business data required to execute the capability.
Outputs	Business outcome and updated journey state.
KPIs	Conversion, SLA, turnaround time, adoption, quality.
Dependencies	Identity, customer, consent, product and integration services.

Sample Requirement IDs

BR-UW-001: Platform shall support create/read/update/search operations.

BR-UW-002: Platform shall maintain complete audit history.

BR-UW-003: Platform shall support configurable business rules.

BR-UW-004: Platform shall expose operational reporting.

BR-UW-005: Platform shall support exception handling and recovery.

BR-PAY — Payment

Requirement Area	Description
Objective	Provide end-to-end business capability for payment.
Actors	Customer, RM, Operations, Admin, Partner Insurer (as applicable).
Core Requirements	Create, search, update, validate, track status, audit actions, configurable rules, report
Business Rules	Rules shall be configurable, version-controlled and auditable.
Inputs	Business data required to execute the capability.
Outputs	Business outcome and updated journey state.
KPIs	Conversion, SLA, turnaround time, adoption, quality.
Dependencies	Identity, customer, consent, product and integration services.

Sample Requirement IDs

BR-PAY-001: Platform shall support create/read/update/search operations.

BR-PAY-002: Platform shall maintain complete audit history.

BR-PAY-003: Platform shall support configurable business rules.

BR-PAY-004: Platform shall expose operational reporting.

BR-PAY-005: Platform shall support exception handling and recovery.

BR-POL — Policy Lifecycle

Requirement Area	Description
Objective	Provide end-to-end business capability for policy lifecycle.
Actors	Customer, RM, Operations, Admin, Partner Insurer (as applicable).
Core Requirements	Create, search, update, validate, track status, audit actions, configurable rules, report
Business Rules	Rules shall be configurable, version-controlled and auditable.
Inputs	Business data required to execute the capability.
Outputs	Business outcome and updated journey state.
KPIs	Conversion, SLA, turnaround time, adoption, quality.
Dependencies	Identity, customer, consent, product and integration services.

Sample Requirement IDs

BR-POL-001: Platform shall support create/read/update/search operations.

BR-POL-002: Platform shall maintain complete audit history.

BR-POL-003: Platform shall support configurable business rules.

BR-POL-004: Platform shall expose operational reporting.

BR-POL-005: Platform shall support exception handling and recovery.

BR-COMM — Communications

Requirement Area	Description
Objective	Provide end-to-end business capability for communications.
Actors	Customer, RM, Operations, Admin, Partner Insurer (as applicable).
Core Requirements	Create, search, update, validate, track status, audit actions, configurable rules, report
Business Rules	Rules shall be configurable, version-controlled and auditable.
Inputs	Business data required to execute the capability.
Outputs	Business outcome and updated journey state.
KPIs	Conversion, SLA, turnaround time, adoption, quality.
Dependencies	Identity, customer, consent, product and integration services.

Sample Requirement IDs

BR-COMM-001: Platform shall support create/read/update/search operations.

BR-COMM-002: Platform shall maintain complete audit history.

BR-COMM-003: Platform shall support configurable business rules.

BR-COMM-004: Platform shall expose operational reporting.

BR-COMM-005: Platform shall support exception handling and recovery.

BR-REP — Reporting & Analytics

Requirement Area	Description
Objective	Provide end-to-end business capability for reporting & analytics.
Actors	Customer, RM, Operations, Admin, Partner Insurer (as applicable).
Core Requirements	Create, search, update, validate, track status, audit actions, configurable rules, report
Business Rules	Rules shall be configurable, version-controlled and auditable.
Inputs	Business data required to execute the capability.
Outputs	Business outcome and updated journey state.
KPIs	Conversion, SLA, turnaround time, adoption, quality.
Dependencies	Identity, customer, consent, product and integration services.

Sample Requirement IDs

BR-REP-001: Platform shall support create/read/update/search operations.

BR-REP-002: Platform shall maintain complete audit history.

BR-REP-003: Platform shall support configurable business rules.

BR-REP-004: Platform shall expose operational reporting.

BR-REP-005: Platform shall support exception handling and recovery.

BR-ADMIN — Administration

Requirement Area	Description
Objective	Provide end-to-end business capability for administration.
Actors	Customer, RM, Operations, Admin, Partner Insurer (as applicable).
Core Requirements	Create, search, update, validate, track status, audit actions, configurable rules, report
Business Rules	Rules shall be configurable, version-controlled and auditable.
Inputs	Business data required to execute the capability.
Outputs	Business outcome and updated journey state.
KPIs	Conversion, SLA, turnaround time, adoption, quality.
Dependencies	Identity, customer, consent, product and integration services.

Sample Requirement IDs

BR-ADMIN-001: Platform shall support create/read/update/search operations.

BR-ADMIN-002: Platform shall maintain complete audit history.

BR-ADMIN-003: Platform shall support configurable business rules.

BR-ADMIN-004: Platform shall expose operational reporting.

BR-ADMIN-005: Platform shall support exception handling and recovery.

BR-INT — Integration Hub

Requirement Area	Description
Objective	Provide end-to-end business capability for integration hub.
Actors	Customer, RM, Operations, Admin, Partner Insurer (as applicable).
Core Requirements	Create, search, update, validate, track status, audit actions, configurable rules, reporting.
Business Rules	Rules shall be configurable, version-controlled and auditable.
Inputs	Business data required to execute the capability.
Outputs	Business outcome and updated journey state.
KPIs	Conversion, SLA, turnaround time, adoption, quality.
Dependencies	Identity, customer, consent, product and integration services.

Sample Requirement IDs

BR-INT-001: Platform shall support create/read/update/search operations.

BR-INT-002: Platform shall maintain complete audit history.

BR-INT-003: Platform shall support configurable business rules.

BR-INT-004: Platform shall expose operational reporting.

BR-INT-005: Platform shall support exception handling and recovery.

BR-SEC — Security, Audit & Compliance

Requirement Area	Description
Objective	Provide end-to-end business capability for security, audit & compliance.
Actors	Customer, RM, Operations, Admin, Partner Insurer (as applicable).
Core Requirements	Create, search, update, validate, track status, audit actions, configurable rules, reporting.
Business Rules	Rules shall be configurable, version-controlled and auditable.
Inputs	Business data required to execute the capability.
Outputs	Business outcome and updated journey state.
KPIs	Conversion, SLA, turnaround time, adoption, quality.
Dependencies	Identity, customer, consent, product and integration services.

Sample Requirement IDs

BR-SEC-001: Platform shall support create/read/update/search operations.

BR-SEC-002: Platform shall maintain complete audit history.

BR-SEC-003: Platform shall support configurable business rules.

BR-SEC-004: Platform shall expose operational reporting.

BR-SEC-005: Platform shall support exception handling and recovery.

Traceability

Business Goal → Capability → Business Requirement → Business Rule → Business Process →
Functional Requirement → API → Test Case → KPI

Next Evolution

The next revision should expand each capability into detailed requirement statements with priorities, acceptance criteria, regulatory references, data ownership, alternate flows, exception scenarios, UI expectations, and requirement-to-process traceability.
