Volume 05 – Business Processes

Important Note

This document consolidates the business processes discussed to date into a baseline process catalogue. It is intended to evolve as workshops uncover additional scenarios. It should not be interpreted as a guarantee that every future business process has already been discovered.

BP-001 — Customer Registration & Authentication

Attribute	Description
Purpose	Customer registration, identity verification and login.
Primary Actors	Customer, RM, Operations, Admin, Insurer (as applicable)
Trigger	Business event initiates the process

KPIs	Turnaround time, conversion, SLA, quality
Outputs	Updated business state and reporting events

BP-004 — Consent Management

Attribute	Description
Purpose	Capture, validate and audit customer consent.
Primary Actors	Customer, RM, Operations, Admin, Insurer (as applicable)
Trigger	Business event initiates the process
Preconditions	Required data, identity and permissions available
Main Outcome	Business objective successfully completed
Alternate Paths	Manual intervention, retries or exception routing
Business Rules	Configurable and auditable
KPIs	Turnaround time, conversion, SLA, quality
Outputs	Updated business state and reporting events

BP-005 — Suitability Assessment

Attribute	Description
Purpose	Evaluate customer needs and eligibility.
Primary Actors	Customer, RM, Operations, Admin, Insurer (as applicable)
Trigger	Business event initiates the process
Preconditions	Required data, identity and permissions available
Main Outcome	Business objective successfully completed
Alternate Paths	Manual intervention, retries or exception routing
Business Rules	Configurable and auditable
KPIs	Turnaround time, conversion, SLA, quality
Outputs	Updated business state and reporting events

BP-006 — Product Discovery

Attribute	Description
Purpose	Identify eligible products using Product Matrix.
Primary Actors	Customer, RM, Operations, Admin, Insurer (as applicable)
Trigger	Business event initiates the process
Preconditions	Required data, identity and permissions available

Main Outcome	Business objective successfully completed
Alternate Paths	Manual intervention, retries or exception routing
Business Rules	Configurable and auditable
KPIs	Turnaround time, conversion, SLA, quality
Outputs	Updated business state and reporting events

BP-007 — Quote Journey

Attribute	Description
Purpose	Obtain, compare and select insurer quotes.
Primary Actors	Customer, RM, Operations, Admin, Insurer (as applicable)
Trigger	Business event initiates the process
Preconditions	Required data, identity and permissions available
Main Outcome	Business objective successfully completed
Alternate Paths	Manual intervention, retries or exception routing
Business Rules	Configurable and auditable
KPIs	Turnaround time, conversion, SLA, quality
Outputs	Updated business state and reporting events

BP-008 — Proposal Journey

Attribute	Description
Purpose	Collect proposal information and submit.
Primary Actors	Customer, RM, Operations, Admin, Insurer (as applicable)
Trigger	Business event initiates the process
Preconditions	Required data, identity and permissions available
Main Outcome	Business objective successfully completed
Alternate Paths	Manual intervention, retries or exception routing
Business Rules	Configurable and auditable
KPIs	Turnaround time, conversion, SLA, quality
Outputs	Updated business state and reporting events

BP-009 — Underwriting Tracking

Attribute	Description
Purpose	Track underwriting requests and outcomes.
Primary Actors	Customer, RM, Operations, Admin, Insurer (as applicable)
Trigger	Business event initiates the process
Preconditions	Required data, identity and permissions available
Main Outcome	Business objective successfully completed

Alternate Paths	Manual intervention, retries or exception routing
Business Rules	Configurable and auditable
KPIs	Turnaround time, conversion, SLA, quality
Outputs	Updated business state and reporting events

BP-010 — Payment

Attribute	Description
Purpose	Initiate and monitor premium payment.
Primary Actors	Customer, RM, Operations, Admin, Insurer (as applicable)
Trigger	Business event initiates the process
Preconditions	Required data, identity and permissions available
Main Outcome	Business objective successfully completed
Alternate Paths	Manual intervention, retries or exception routing
Business Rules	Configurable and auditable
KPIs	Turnaround time, conversion, SLA, quality
Outputs	Updated business state and reporting events

BP-011 — Policy Issuance

Attribute	Description
Purpose	Receive and present issued policy.
Primary Actors	Customer, RM, Operations, Admin, Insurer (as applicable)
Trigger	Business event initiates the process
Preconditions	Required data, identity and permissions available
Main Outcome	Business objective successfully completed
Alternate Paths	Manual intervention, retries or exception routing
Business Rules	Configurable and auditable
KPIs	Turnaround time, conversion, SLA, quality
Outputs	Updated business state and reporting events

BP-012 — Customer Communication

Attribute	Description
Purpose	Send notifications across journey stages.
Primary Actors	Customer, RM, Operations, Admin, Insurer (as applicable)
Trigger	Business event initiates the process
Preconditions	Required data, identity and permissions available
Main Outcome	Business objective successfully completed
Alternate Paths	Manual intervention, retries or exception routing

Business Rules	Configurable and auditable
KPIs	Turnaround time, conversion, SLA, quality
Outputs	Updated business state and reporting events

BP-013 — RM Workspace

Attribute	Description
Purpose	Manage customer portfolio and tasks.
Primary Actors	Customer, RM, Operations, Admin, Insurer (as applicable)
Trigger	Business event initiates the process
Preconditions	Required data, identity and permissions available
Main Outcome	Business objective successfully completed
Alternate Paths	Manual intervention, retries or exception routing
Business Rules	Configurable and auditable
KPIs	Turnaround time, conversion, SLA, quality
Outputs	Updated business state and reporting events

BP-014 — Operations & Exception Handling

Attribute	Description
Purpose	Manual review, correction and escalations.
Primary Actors	Customer, RM, Operations, Admin, Insurer (as applicable)
Trigger	Business event initiates the process
Preconditions	Required data, identity and permissions available
Main Outcome	Business objective successfully completed
Alternate Paths	Manual intervention, retries or exception routing
Business Rules	Configurable and auditable
KPIs	Turnaround time, conversion, SLA, quality
Outputs	Updated business state and reporting events

BP-015 — Reporting & Analytics

Attribute	Description
Purpose	Operational and management reporting.
Primary Actors	Customer, RM, Operations, Admin, Insurer (as applicable)
Trigger	Business event initiates the process
