

Insurance Distribution Platform

Volume 06 – Customer & RM Journey Catalogue

Scope

This document captures the end-to-end customer and Relationship Manager (RM) journeys discussed so far. It serves as the programme baseline and is expected to evolve as additional business scenarios are discovered. It should not be interpreted as a guarantee that every future journey has already been identified.

Customer End-to-End Journey

CJ-01 Discover

Customer expresses insurance need.

CJ-02 Registration

Register/login and identity verification.

CJ-03 Customer Profile

Capture or retrieve customer details.

CJ-04 Consent

Obtain and record consent.

CJ-05 Suitability

Assess objectives, demographics and risk profile.

CJ-06 Product Discovery

Determine eligible products using Product Matrix.

CJ-07 Quote Comparison

Fetch and compare insurer quotes.

CJ-08 Quote Selection

Select preferred quote.

CJ-09 Proposal

Complete proposal questionnaire and declarations.

CJ-10 Underwriting

Track medical/underwriting decisions.

CJ-11 Payment

Pay premium and verify transaction.

CJ-12 Policy Issuance

Receive issued policy and documents.

CJ-13 Post-Issuance

View policy status, communications and servicing requests.

Relationship Manager End-to-End Journey

RMJ-01 Lead Creation

Create or receive lead.

RMJ-02 Customer Lookup

Search existing customer or register new.

RMJ-03 Customer Assistance

Guide customer through onboarding.

RMJ-04 Consent Validation

Ensure valid consent exists.

RMJ-05 Suitability

Capture financial and insurance needs.

RMJ-06 Product Recommendation

Review eligible products.

RMJ-07 Quote Assistance

Request and explain quotes.

RMJ-08 Proposal Assistance

Help complete proposal.

RMJ-09 Underwriting Coordination

Coordinate insurer requirements.

RMJ-10 Payment Follow-up

Ensure payment completion.

RMJ-11 Policy Delivery

Confirm issuance and customer acknowledgement.

RMJ-12 Portfolio Management

Track leads, policies, renewals and follow-ups.

RMJ-13 Exception Handling

Resolve validation failures, insurer queries and operational escalations.

Common Alternate & Exception Journeys

- Customer abandons quote and resumes later.
- Consent expires or is withdrawn.
- Customer becomes ineligible after suitability.
- No eligible products returned.
- Quote expires before proposal.
- Underwriting requests additional information or medical examination.
- Payment failure and retry.
- Policy issuance delayed or rejected.
- Manual operations intervention.
- Insurer integration unavailable; retry/escalation.

Journey State Model

Lead → Consent → Suitability → Product Discovery → Quote → Proposal → Underwriting →
Payment → Policy Issuance → Active Policy → Ongoing Servicing

Traceability

Business Goals → Business Processes → Customer/RM Journeys → Business Requirements →
Business Rules → Functional Specifications → APIs → Test Scenarios
