

Insurance Distribution Platform

Phase 2 – Business Requirement Catalogue (v0.1)

Purpose

This document defines the business requirement catalogue for the proposed bank-owned Insurance Distribution Platform. It expands the Phase 1 capability map into structured business capabilities and establishes the foundation for detailed BRD, functional specifications, architecture, APIs and implementation planning. The document is intentionally technology-neutral.

BR-CUST – Customer Management

Section	Description
Business Objective	Provide enterprise capability for customer management.
Primary Actors	Customer, RM, Operations, Admin (as applicable)
Key Functions	Create, View, Update, Search, Track, Audit and Report.
Business Inputs	Customer, RM, product, insurer and journey information.
Business Outputs	Validated business outcome and updated journey state.
Business Rules	Configurable, auditable and version-controlled.
KPIs	Turnaround time, conversion, quality, SLA, adoption.
Dependencies	Identity, customer, consent, product, reporting and integration capabilities.
Future Readiness	Support 1SB initially and direct insurer integrations later without changing business l

Sample Requirement Template

Requirement ID: BR-CUST-001

Requirement: The platform shall support this capability end-to-end.

Business Rationale: Improve customer experience and operational efficiency.

Acceptance Criteria: Capability is available, auditable, secure and measurable.

Priority: P0/P1 based on business roadmap.

BR-RM – RM Workspace

Section	Description
Business Objective	Provide enterprise capability for rm workspace.
Primary Actors	Customer, RM, Operations, Admin (as applicable)
Key Functions	Create, View, Update, Search, Track, Audit and Report.
Business Inputs	Customer, RM, product, insurer and journey information.
Business Outputs	Validated business outcome and updated journey state.
Business Rules	Configurable, auditable and version-controlled.
KPIs	Turnaround time, conversion, quality, SLA, adoption.
Dependencies	Identity, customer, consent, product, reporting and integration capabilities.

Future Readiness	Support 1SB initially and direct insurer integrations later without changing business l
------------------	---

Sample Requirement Template

Requirement ID: BR-RM-001

Requirement: The platform shall support this capability end-to-end.

Business Rationale: Improve customer experience and operational efficiency.

Acceptance Criteria: Capability is available, auditable, secure and measurable.

Priority: P0/P1 based on business roadmap.

BR-LEAD – Lead Management

Section	Description
Business Objective	Provide enterprise capability for lead management.
Primary Actors	Customer, RM, Operations, Admin (as applicable)
Key Functions	Create, View, Update, Search, Track, Audit and Report.
Business Inputs	Customer, RM, product, insurer and journey information.
Business Outputs	Validated business outcome and updated journey state.
Business Rules	Configurable, auditable and version-controlled.
KPIs	Turnaround time, conversion, quality, SLA, adoption.
Dependencies	Identity, customer, consent, product, reporting and integration capabilities.
Future Readiness	Support 1SB initially and direct insurer integrations later without changing business l

Sample Requirement Template

Requirement ID: BR-LEAD-001

Requirement: The platform shall support this capability end-to-end.

Business Rationale: Improve customer experience and operational efficiency.

Acceptance Criteria: Capability is available, auditable, secure and measurable.

Priority: P0/P1 based on business roadmap.

BR-CONSENT – Consent Management

Section	Description
Business Objective	Provide enterprise capability for consent management.
Primary Actors	Customer, RM, Operations, Admin (as applicable)
Key Functions	Create, View, Update, Search, Track, Audit and Report.
Business Inputs	Customer, RM, product, insurer and journey information.
Business Outputs	Validated business outcome and updated journey state.
Business Rules	Configurable, auditable and version-controlled.
KPIs	Turnaround time, conversion, quality, SLA, adoption.
Dependencies	Identity, customer, consent, product, reporting and integration capabilities.
Future Readiness	Support 1SB initially and direct insurer integrations later without changing business l

Sample Requirement Template

Requirement ID: BR-CONSENT-001

Requirement: The platform shall support this capability end-to-end.

Business Rationale: Improve customer experience and operational efficiency.

Acceptance Criteria: Capability is available, auditable, secure and measurable.

Priority: P0/P1 based on business roadmap.

BR-SUIT – Suitability & Recommendation

Section	Description
Business Objective	Provide enterprise capability for suitability & recommendation.
Primary Actors	Customer, RM, Operations, Admin (as applicable)
Key Functions	Create, View, Update, Search, Track, Audit and Report.
Business Inputs	Customer, RM, product, insurer and journey information.
Business Outputs	Validated business outcome and updated journey state.
Business Rules	Configurable, auditable and version-controlled.
KPIs	Turnaround time, conversion, quality, SLA, adoption.
Dependencies	Identity, customer, consent, product, reporting and integration capabilities.
Future Readiness	Support 1SB initially and direct insurer integrations later without changing business l

Sample Requirement Template

Requirement ID: BR-SUIT-001

Requirement: The platform shall support this capability end-to-end.

Business Rationale: Improve customer experience and operational efficiency.

Acceptance Criteria: Capability is available, auditable, secure and measurable.

Priority: P0/P1 based on business roadmap.

BR-PROD – Product Catalogue & Product Matrix

Section	Description
Business Objective	Provide enterprise capability for product catalogue & product matrix.
Primary Actors	Customer, RM, Operations, Admin (as applicable)
Key Functions	Create, View, Update, Search, Track, Audit and Report.
Business Inputs	Customer, RM, product, insurer and journey information.
Business Outputs	Validated business outcome and updated journey state.
Business Rules	Configurable, auditable and version-controlled.
KPIs	Turnaround time, conversion, quality, SLA, adoption.
Dependencies	Identity, customer, consent, product, reporting and integration capabilities.
Future Readiness	Support 1SB initially and direct insurer integrations later without changing business l

Sample Requirement Template

Requirement ID: BR-PROD-001

Requirement: The platform shall support this capability end-to-end.

Business Rationale: Improve customer experience and operational efficiency.

Acceptance Criteria: Capability is available, auditable, secure and measurable.

Priority: P0/P1 based on business roadmap.

BR-QUOTE – Quote Management

Section	Description
Business Objective	Provide enterprise capability for quote management.
Primary Actors	Customer, RM, Operations, Admin (as applicable)
Key Functions	Create, View, Update, Search, Track, Audit and Report.
Business Inputs	Customer, RM, product, insurer and journey information.
Business Outputs	Validated business outcome and updated journey state.
Business Rules	Configurable, auditable and version-controlled.
KPIs	Turnaround time, conversion, quality, SLA, adoption.
Dependencies	Identity, customer, consent, product, reporting and integration capabilities.
Future Readiness	Support 1SB initially and direct insurer integrations later without changing business l

Sample Requirement Template

Requirement ID: BR-QUOTE-001

Requirement: The platform shall support this capability end-to-end.

Business Rationale: Improve customer experience and operational efficiency.

Acceptance Criteria: Capability is available, auditable, secure and measurable.

Priority: P0/P1 based on business roadmap.

BR-COMP – Quote Comparison

Section	Description
Business Objective	Provide enterprise capability for quote comparison.
Primary Actors	Customer, RM, Operations, Admin (as applicable)
Key Functions	Create, View, Update, Search, Track, Audit and Report.
Business Inputs	Customer, RM, product, insurer and journey information.
Business Outputs	Validated business outcome and updated journey state.
Business Rules	Configurable, auditable and version-controlled.
KPIs	Turnaround time, conversion, quality, SLA, adoption.
Dependencies	Identity, customer, consent, product, reporting and integration capabilities.
Future Readiness	Support 1SB initially and direct insurer integrations later without changing business l

Sample Requirement Template

Requirement ID: BR-COMP-001

Requirement: The platform shall support this capability end-to-end.

Business Rationale: Improve customer experience and operational efficiency.

Acceptance Criteria: Capability is available, auditable, secure and measurable.
Priority: P0/P1 based on business roadmap.

BR-PROP – Proposal Management

Section	Description
Business Objective	Provide enterprise capability for proposal management.
Primary Actors	Customer, RM, Operations, Admin (as applicable)
Key Functions	Create, View, Update, Search, Track, Audit and Report.
Business Inputs	Customer, RM, product, insurer and journey information.
Business Outputs	Validated business outcome and updated journey state.
Business Rules	Configurable, auditable and version-controlled.
KPIs	Turnaround time, conversion, quality, SLA, adoption.
Dependencies	Identity, customer, consent, product, reporting and integration capabilities.
Future Readiness	Support 1SB initially and direct insurer integrations later without changing business l

Sample Requirement Template

Requirement ID: BR-PROP-001

Requirement: The platform shall support this capability end-to-end.

Business Rationale: Improve customer experience and operational efficiency.

Acceptance Criteria: Capability is available, auditable, secure and measurable.

Priority: P0/P1 based on business roadmap.

BR-UW – Underwriting Tracking

Section	Description
Business Objective	Provide enterprise capability for underwriting tracking.
Primary Actors	Customer, RM, Operations, Admin (as applicable)
Key Functions	Create, View, Update, Search, Track, Audit and Report.
Business Inputs	Customer, RM, product, insurer and journey information.
Business Outputs	Validated business outcome and updated journey state.
Business Rules	Configurable, auditable and version-controlled.
KPIs	Turnaround time, conversion, quality, SLA, adoption.
Dependencies	Identity, customer, consent, product, reporting and integration capabilities.
Future Readiness	Support 1SB initially and direct insurer integrations later without changing business l

Sample Requirement Template

Requirement ID: BR-UW-001

Requirement: The platform shall support this capability end-to-end.

Business Rationale: Improve customer experience and operational efficiency.

Acceptance Criteria: Capability is available, auditable, secure and measurable.

Priority: P0/P1 based on business roadmap.

BR-PAY – Payment Management

Section	Description
Business Objective	Provide enterprise capability for payment management.
Primary Actors	Customer, RM, Operations, Admin (as applicable)
Key Functions	Create, View, Update, Search, Track, Audit and Report.
Business Inputs	Customer, RM, product, insurer and journey information.
Business Outputs	Validated business outcome and updated journey state.
Business Rules	Configurable, auditable and version-controlled.
KPIs	Turnaround time, conversion, quality, SLA, adoption.
Dependencies	Identity, customer, consent, product, reporting and integration capabilities.
Future Readiness	Support 1SB initially and direct insurer integrations later without changing business l

Sample Requirement Template

Requirement ID: BR-PAY-001

Requirement: The platform shall support this capability end-to-end.

Business Rationale: Improve customer experience and operational efficiency.

Acceptance Criteria: Capability is available, auditable, secure and measurable.

Priority: P0/P1 based on business roadmap.

BR-POL – Policy Management

Section	Description
Business Objective	Provide enterprise capability for policy management.
Primary Actors	Customer, RM, Operations, Admin (as applicable)
Key Functions	Create, View, Update, Search, Track, Audit and Report.
Business Inputs	Customer, RM, product, insurer and journey information.
Business Outputs	Validated business outcome and updated journey state.
Business Rules	Configurable, auditable and version-controlled.
KPIs	Turnaround time, conversion, quality, SLA, adoption.
Dependencies	Identity, customer, consent, product, reporting and integration capabilities.
Future Readiness	Support 1SB initially and direct insurer integrations later without changing business l

Sample Requirement Template

Requirement ID: BR-POL-001

Requirement: The platform shall support this capability end-to-end.

Business Rationale: Improve customer experience and operational efficiency.

Acceptance Criteria: Capability is available, auditable, secure and measurable.

Priority: P0/P1 based on business roadmap.

BR-SERV – Renewal & Servicing

Section	Description
Business Objective	Provide enterprise capability for renewal & servicing.
Primary Actors	Customer, RM, Operations, Admin (as applicable)
Key Functions	Create, View, Update, Search, Track, Audit and Report.
Business Inputs	Customer, RM, product, insurer and journey information.
Business Outputs	Validated business outcome and updated journey state.
Business Rules	Configurable, auditable and version-controlled.
KPIs	Turnaround time, conversion, quality, SLA, adoption.
Dependencies	Identity, customer, consent, product, reporting and integration capabilities.
Future Readiness	Support 1SB initially and direct insurer integrations later without changing business l

Sample Requirement Template

Requirement ID: BR-SERV-001

Requirement: The platform shall support this capability end-to-end.

Business Rationale: Improve customer experience and operational efficiency.

Acceptance Criteria: Capability is available, auditable, secure and measurable.

Priority: P0/P1 based on business roadmap.

BR-COMM – Communication

Section	Description
Business Objective	Provide enterprise capability for communication.
Primary Actors	Customer, RM, Operations, Admin (as applicable)
Key Functions	Create, View, Update, Search, Track, Audit and Report.
Business Inputs	Customer, RM, product, insurer and journey information.
Business Outputs	Validated business outcome and updated journey state.
Business Rules	Configurable, auditable and version-controlled.
KPIs	Turnaround time, conversion, quality, SLA, adoption.
Dependencies	Identity, customer, consent, product, reporting and integration capabilities.
Future Readiness	Support 1SB initially and direct insurer integrations later without changing business l

Sample Requirement Template

Requirement ID: BR-COMM-001

Requirement: The platform shall support this capability end-to-end.

Business Rationale: Improve customer experience and operational efficiency.

Acceptance Criteria: Capability is available, auditable, secure and measurable.

Priority: P0/P1 based on business roadmap.

BR-REP – Reporting & Analytics

Section	Description
---------	-------------

Business Objective	Provide enterprise capability for reporting & analytics.
Primary Actors	Customer, RM, Operations, Admin (as applicable)
Key Functions	Create, View, Update, Search, Track, Audit and Report.
Business Inputs	Customer, RM, product, insurer and journey information.
Business Outputs	Validated business outcome and updated journey state.
Business Rules	Configurable, auditable and version-controlled.
KPIs	Turnaround time, conversion, quality, SLA, adoption.
Dependencies	Identity, customer, consent, product, reporting and integration capabilities.
Future Readiness	Support 1SB initially and direct insurer integrations later without changing business l

Sample Requirement Template

Requirement ID: BR-REP-001

Requirement: The platform shall support this capability end-to-end.

Business Rationale: Improve customer experience and operational efficiency.

Acceptance Criteria: Capability is available, auditable, secure and measurable.

Priority: P0/P1 based on business roadmap.

BR-ADMIN – Administration

Section	Description
Business Objective	Provide enterprise capability for administration.
Primary Actors	Customer, RM, Operations, Admin (as applicable)
Key Functions	Create, View, Update, Search, Track, Audit and Report.
Business Inputs	Customer, RM, product, insurer and journey information.
Business Outputs	Validated business outcome and updated journey state.
Business Rules	Configurable, auditable and version-controlled.
KPIs	Turnaround time, conversion, quality, SLA, adoption.
Dependencies	Identity, customer, consent, product, reporting and integration capabilities.
Future Readiness	Support 1SB initially and direct insurer integrations later without changing business l

Sample Requirement Template

Requirement ID: BR-ADMIN-001

Requirement: The platform shall support this capability end-to-end.

Business Rationale: Improve customer experience and operational efficiency.

Acceptance Criteria: Capability is available, auditable, secure and measurable.

Priority: P0/P1 based on business roadmap.

BR-INT – Integration Hub

Section	Description
Business Objective	Provide enterprise capability for integration hub.
Primary Actors	Customer, RM, Operations, Admin (as applicable)

Key Functions	Create, View, Update, Search, Track, Audit and Report.
Business Inputs	Customer, RM, product, insurer and journey information.
Business Outputs	Validated business outcome and updated journey state.
Business Rules	Configurable, auditable and version-controlled.
KPIs	Turnaround time, conversion, quality, SLA, adoption.
Dependencies	Identity, customer, consent, product, reporting and integration capabilities.
Future Readiness	Support 1SB initially and direct insurer integrations later without changing business l

Sample Requirement Template

Requirement ID: BR-INT-001

Requirement: The platform shall support this capability end-to-end.

Business Rationale: Improve customer experience and operational efficiency.

Acceptance Criteria: Capability is available, auditable, secure and measurable.

Priority: P0/P1 based on business roadmap.

BR-SEC – Identity, Security & Audit

Section	Description
Business Objective	Provide enterprise capability for identity, security & audit.
Primary Actors	Customer, RM, Operations, Admin (as applicable)
Key Functions	Create, View, Update, Search, Track, Audit and Report.
Business Inputs	Customer, RM, product, insurer and journey information.
Business Outputs	Validated business outcome and updated journey state.
Business Rules	Configurable, auditable and version-controlled.
KPIs	Turnaround time, conversion, quality, SLA, adoption.
Dependencies	Identity, customer, consent, product, reporting and integration capabilities.
Future Readiness	Support 1SB initially and direct insurer integrations later without changing business l

Sample Requirement Template

Requirement ID: BR-SEC-001

Requirement: The platform shall support this capability end-to-end.

Business Rationale: Improve customer experience and operational efficiency.

Acceptance Criteria: Capability is available, auditable, secure and measurable.

Priority: P0/P1 based on business roadmap.

Traceability Model

Business Vision → Capability → Business Requirement → Business Process → Functional Specification → API Specification → Solution Design → Test Case → Production KPI.

Next Deliverable

Phase 3 will decompose each capability into detailed business processes, customer journeys, alternate flows, business rules, exception scenarios, ownership, KPIs and acceptance criteria.
